

Magento Open Source and Adobe Commerce · 8 September 2026

StyleSmuggler fix for Magento 2.2.0 to 2.4.3

Adobe's hotfix stops at Commerce 2.4.4 and Open Source 2.4.6. scandiweb rebuilt it for 41 older versions. The 41 patch files are attached to this PDF.

Attackers can run code on your store **without any login**

StyleSmuggler is a flaw in the Magento core. A successful attack can expose customer data, change your store or install malware.

Download link: scandiweb.com/solutions/magento/stylesmuggler/patches.tar.gz. The same file is also attached inside this PDF for Adobe Acrobat and Chrome. Check the SHA-256 above after downloading.

Provided as is. These patches are scandiweb's backport of Adobe's hotfix, not an Adobe release. Test on a staging copy with a backup in place; applying them to your store is your decision and responsibility. Full note on page 9.

Before you patch, check for a break-in

If your store has been online since 4 September, look first. A patch does not remove an attacker who is already inside.

Unexpected "Payment Transaction Failed Reminder" emails

Unfamiliar background processes on the server

New scheduled tasks

Unknown files in the report and temp folders

Apply the patch in 4 steps

1**Start on staging**

Take a snapshot you can roll back to.

2**Apply the patch for your exact version**

From your Magento root: `patch -p1 < VULN-39341_<version>.patch`

3**Test the shopping journey**

Cart, checkout, payment and transactional email. Then repeat on production.

4**Rotate the encryption key and credentials**

Adobe requires this alongside its hotfix.

What clients said

Every scandiweb Magento and Adobe Commerce client store was secured on 5 September, the day the flaw became public, and every client heard from us that day.

“Thank you for the proactive response. Please proceed with the assessment and any required mitigation activities.”

Purdys Chocolatier

“Thanks, I appreciate the proactive approach here. Please keep us updated.”

Airthings

“Thanks all. We greatly appreciate the proactive response.”

Beauty Works

Rather have us **do it for you?**

We check your store for a break-in, apply the patch, test the shopping journey and rotate the keys. Not a client yet? Book a call and we agree the scope with you first.
